

INDEX.

Those articles marked * have reference to the Apprentice's Companion.

- A.**
- Achromatic Lens, on the principle of the construction of. . . 85
- Action and Reaction in the Collision of Bodies. . . *35
- Address to Parents, Guardians, and Apprentices throughout the United States. . . *3
- Advice to Apprentices. . . *17
- Advice from a Father to his Son. . . *45
- Affection, pure and real. . . 48
- Alkaloids, new. . . *16
- American Institute, its use, character, objects, laws, &c., described, in Mr. T. B. Wakeman's Lecture before the members. . . 68
- American Patents. . . 98, 112, 140, 197, 281
- Anchors for Ships, means proposed for preventing them from driving. . . 105
- Angevine's Washing Machine described. . . 47
- Apprentice's Companion, address of the publisher. . . *1
- Aqueduct at Lisbon, account of. . . *16
- Architecture, compendium of, continued from vol. iv. . . 133, 209, 250
- Archery, perfection in. . . 176
- Artists made by accident. . . 158
- Artillery (brass), method of proving in foreign countries. . . 245
- Ashes, fire from. . . 41
- Assaying, experiments in. . . 287
- Avery's Rotary Steam Engine, . . . 141, 303
- Axes, new method of manufacturing. . . 304
- Axle Tree and Box for Carriages . . . 2
- Axle Trees and Axle Friction. . . 217
- Azote in Seeds. . . 215
- B.**
- Ball Projector, for firing 2000 balls, of 8 oz. each, per minute. . . 178
- Bark Mill, Seabury & Young's improved patent one. . . 289
- Barometer, on the construction of, by Mr. Green. . . 259
- Bead Making at Venice, method of described. . . 100
- Bees, on the management of, and observations on Mr. Nutt's system. . . 59
- Beginning the World at the Wrong End. . . *23
- Bellows, on the theory of. . . 109
- Biography of Self-taught Men—
No. 1, Mr. W. Whipple. . . *14
No. 2, Roger Sherman. . . *28
No. 3, Nathaniel Smith. . . *41
- Birch's Patent Axle Tree and Box for Carriages. . . 2
- Birth, on the obscurity of in individuals. . . *6
- Biscuits, Ship, apparatus for making described. . . 290, 291, 292, 293, 294
- Blast at Craigleth Quarry, Scotland, account of. . . 143
- Bleaching Spun Cotton, improved method of. . . 123
- Book of Science, extracts from. . . *32
- Botanic Prizes gained by Students. . . *16
- Boats, swift ones on canals. . . 248
- Bridge, proposed suspension one between N. York and Brooklyn. . . 17
- Bread made from Wood, result of experiments by Dr. Prout. . . 176
- Brick Making Machine, Harkness' improved, described. . . £5, 205
- C.**
- Canton, buildings in. . . 231
- Canal, Erie, table showing the great and increasing trade of. . . 42
- Capital, substitute for the want of. . . *40
- Carriages (locomotive) on common roads in England. . . 248
- Carpentry, useful questions in. . . 253
- Carriage Stopper for use on Inclined Planes. . . 17
- Caves, curiosities of. . . 96
- Cements. . . 298
- Chandler's Morticing Machine, account of. . . *31
- Chameleons, change in colors of accounted for. . . 112
- Chimneys, smoky ones, Youldon's improvements in curing. . . 81
- Method of preventing in Paris . . . 245
- Churn, patent lever double one, (Angevine's,) described. . . 48
- Church's Steam Carriage. . . 259
- Chair, Hay's easy, invention described. . . 280
- Chinese Gongs, account of. . . 230
- Circulation in Animals and Plants. . . 207
- Circle, repeating or reflecting. . . ib.
- Civilization, life prolonged by. . . 31
- Coal in Massachusetts. . . 224
- Coal, anthracite, specification of Phineas Davis' patent for promoting combustion in locomotive and other steam engines. . . 233
- Color on Heat, influence of. . . 178
- Compendium of Civil Architecture, continued from vol. iv. . . 21, 133, 209, 250
- Compensating Pendulum, described. . . 214
- Cone Drums, mathematical calculations respecting. . . 45
- Copper found near Lake Superior. . . 127
- Culture in the Air, account of. . . 128
- Cutting Press, Penny's improved one described. . . 295, 296, 297
- D.**
- Divisibility. . . *16
- Divisibility of Matter. . . *48
- Divisibility of Matter. . . 245
- Diving Bell, Lieut. Long's new one, described. . . 256
- Drilling Holes in Glass for Philosophical Instruments, method of. . . 294
- Drunkenness, on the evils and demoralizing effects of. . . *19
- Dry Rot, Dr. Birkbeck's eulogy on Mr. Kyan's plan of preventing before the Society of Arts. . . 62
- Dufresnoy's Report on the Use of Hot Air in the Iron Works of England and Scotland, 237, 320, 321, 322, 323, 324, 325, 326, 327, 328
- E.**
- Earthenware and Porcelain, particulars respecting. . . 82
- Early Impressions in young persons as it regards choice of trade or profession, should be cherished. . . *18
- Eastman's Central-discharging Water Wheel. . . 241
- Education, if I could but acquire it. . . *19

- Electro Magnetism, Chilton's Galvanic Magnet described... 105
 Elliott's Gravitating Rotary Engine..... 139
 Encouragement and Discouragement, effects of..... *17
 Engraving in Relief, observations on..... 204
 Mr. Ormsby's reply to those observations..... 287
 Enterprize, hints on..... *5
 Engineering, report of the present state of Hydraulics as a branch of..... 3, 4, 5, 6, 7, 8
 Ewbank's new process of Tinning Lead Pipes..... 295
 Expansion Valves, new method of working them..... 246
- F.**
- Farmers' occupation, advantages attending it, stated by S. Blydenburgh..... 46
 Filter, cheap and effective one for family use..... 175
 Fire by the heat of the Sun.... 111
 Fire Ladder, improved portable 132
 Fire Arms, specification of R. Walker's improvements for wadding..... 254
 Fire Tongs, improvements in .. 298
 Fires in London in 1834, account of, 307, 308, 309, 310, 311, 312, 313
 Fly, surprising swiftness in.... 19
 Flame, proof that it is hollow.. 103
 Flower Stand, cast iron one.... 302
 Flour, adulterations in, method of detecting..... 306
 Fossil Wax..... 19
 Franklin, Benjamin, extracts from a codicil to his will, for the benefit of apprentices... *2
 Franklin, Benjamin, anecdote of. *9
 Franklin Institute—
 Monthly Conversation at ..94, 123
 Report of the Committee on Science and Arts, respecting J. S. Kite's Improvements on Axles for Railroad Cars..... 94
 On Sir H. R. Campbell's Spirit Level..... 95
 On Wiswall's Patent Angular Sawing and Boring Machine..... 95
 On Woodside's Revolving Harrow and Seed Cart.... 124
 On John Pierpont's Fireplace Friction Bushes, new method of casting, by Lewis Aspinwall..... 318
 Frugality contrasted with Prodigality..... *11
 Fuel, comparative value of.... 31
- G.**
- Galvanism, made use of as a mechanical power..... 215
 Geology..... 230
 Geometry, useful problems in.. 314
 Grammar, benefits of having a thorough knowledge of.... *17
 Gueymard's Report on employing Hot Air in smelting Iron with Charcoal..... 235
 Gum Elastic, specification of the patent of G. Duncan Cooper, for the application of it to roofs of houses and vessels... 187
- Gun, with a revolving breech... 305
- H.**
- Hay's Easy Chair, described... 280
 Harkness' Brick Making Machine, described..... 65, 205
 Heat Governor, a self-acting apparatus, described by Dr. Ure 88
 Heating Apparatus, Perkins' plan described..... 106
 Hedges, essay on raising and managing..... 161
 Hints to Young Men..... *43
 Hooks and Eyes, new method of making..... 224
 Holes through the Floors of a Mill, method of cutting for belts to pass, to operate on machines..... 189
 Honey, intoxicating..... 96
 Hoops for Casks, iron ones, specification of John Young's patent for improvements in .. 223
 Horse Power, and Thrashing Machine, account of..... 44
 Hot Air—
 Extract from E. Gueymard's report on the employment of it in smelting iron with charcoal..... 235
 Dufresnoy's Report on the use of in the Iron Works of England and Scotland, 237, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328
 Houses, roofing them, specification of North's improved patent for..... 43
 Hydrate of Phosphorus..... *31
 Hydraulics, report on the present state and progress of as a branch of engineering, 3, 4, 5, 6, 7, 8, 153, 154, 155, 156, 157, 310
- I.**
- Inclined Planes, carriage stopper to be used upon..... 17
 Indian Rubber Coating, proposed as a substitute for leaden coffins..... 175
 Industry—
 Extract from an essay on.... *9
 Contrasted with Idleness *11
 Infantile Instruction, instance of the inutility of forcing it 240
 Ingenious Mechanism, account of 104
 Iron, Meteoric, from Louisiana.. 126
 Iron Steamboat—
 Built at Manchester, England 175
 in India..... 182
- K.**
- Knowledge, how to acquire it.. *7
 —, as it regards the medical profession..... 48
 Knowledge for the People, by John Timbs, of London, extracts from..... *10, 27, 46, 47
- L.**
- Learning, aid to..... *16
 Leather, various methods of preparing..... 121
 Life prolonged by civilization, instances of..... 31
 Lime—
 Method of hardening under water, by A. D. Bache.... 130
 Effects of on fish..... 260
- Locks, on the substitution of for inclined planes on railways... 299
 Locomotive Engine—
 On a new construction..... 64
 On common roads..... 153, 248
 Report on Mr. M. W. Baldwin's plan respecting..... 278
- M.**
- Machine for planting Corn, described..... 206
 Manual Labor and Civil Cultivation..... 160
 Marriages, early, Dr. Franklin's opinion respecting..... *6
 Mariner's Compass, supposed inventor of..... 112
 Mathematical Science, on the comparative claims and importance of, by B. Cheverton, L. Frend, and others..... 49
 Mechanics, on the education of. *7
 Men of Leisure, and Men of Business..... *8
 Meteorological Record, kept at Avoylle Ferry, Red River, Louisiana, in Oct. and Nov., 1834..... 32
 Milk Weed, a substitute for flax 128
 Mines, account of the greatest depths of in the world, by John Taylor..... 92
 Motion, different kinds of.... *38
 Mouldiness, origin of..... 175
 Moving Power, new one..... 215
 Musical Instruments, specification of patent granted to Goldsworthy Gurney for improvements..... 97
 Musical Instrument, how to make a bass viol a third or fifth degree higher or lower.. 300
- N.**
- Natural History, notes on the study of..... 166
 Naval Architecture, Jeremiah Owen's remarks upon..... 85
 Naval Ingenuity..... 207
 Newton, Sir Isaac, Dr. Chalmers' remarks upon..... 64
 Nipalese, or Paper manufactured in Hindoostan, method of making, &c..... 90
 Nott, Dr.'s, Stoves for Burning Coal, useful to tanners..... 3
- P.**
- Paper Making, native method of in Hindostan, called Nipalese..... 90
 Papyrus, as it grows in Sicily, described..... 124
 Pascalis, Dr. Felix, notice of his efforts to introduce the manufacture of silks from mulberry seed in America..... 71
 Patents, American..... 98, 112, 140, 197, 281
 Pendulum, compensating..... 214
 Penitentiary System in Philadelphia, inquiry into the effects of..... 190
 Penny's Cutting Press, described, 295, 296, 297
 Penny's Improved Ploughs for Stationers..... 297
 Pewter, different sorts of, described..... 62

- Pin Heading, described..... 255
 Pierpont's Fireplace, described. 124
 Platina, discovery of in France. 112
 Political Economy, lesson on... *25
 Porcelain and Earthenware, particulars respecting..... 82
 Poets and Philosophers made by accident..... 159
 Pumps, specification of John Barton's patent for improvements in..... 142
 Pumping, plan of a steam engine for..... 87
- Q.**
- Quadrupeds of Melville Island.. 328
- R.**
- Railways—
 Undulating..... 15, 179, 255, 257
 London and Birmingham.... 112
 Report of Directors of London and Birmingham..... 169
 Vicksburg..... 16
 Tusculumbia and Decatur.... 64
 Railroad Locks, remarks on... 278
 Railway Bars, remarks on the best form, and on the defects of, by R. Stephenson..... 269
 Ralston, Gerard, letter from... 248
 Reed's Improved Carriage Drag, specification of a patent for... 129
 Report on the Progress of the Useful Arts in Scotland, first essay preliminary to a series... 183
 Riches, not always calculated to make the possessor happy.... *19
 River Richlieu, from Lake Champlain to Sorel, account of..... 14
 Rotary Steam Engine, Avery's. 141
 Rudders for Ships, Mr. Holdsworth's improvements on.... 225
- S.**
- Salt Water, method of converting into fresh..... 14
 Saul's Cast Iron Flower and Garden Stand..... 302
 Screw, description of..... *12
 Scripture's Power Press, described..... 247
 Sextant, important improvement in, account of..... 30
 Self-Instruction, extract of a letter on by Judge Buel..... *28
 Self-Denial, anecdote of..... *42
 Shad, method of catching by steam..... 216
 Ships' Bottoms, remarks on sheathing them with copper.. 251
 Silk, on the culture of from mulberry seed..... 70, 229
 Slides and Valves of Steam Engines, method of using them when working steam expansively..... 185
- Sluice Governor, or Regulator.. 301
 Soapstone in Massachusetts... 127
 Soap Making from Animal Substances..... 128
 Soda, Charles Atwood's specification of his improved method of purifying..... 172
 Spectacle Glasses..... 102
 Spectacles—
 New method of making..... *16
 When to begin to wear them. 328
 Speculation, hints on..... *5
 Spiders—
 Habits of..... 13
 Curious facts respecting.... 55
 Snake suspended by, account of..... 261
 Spontaneous Combustion, account of..... 41, 111
 State Prison Labor, inquiry into the Penitentiary System.... 190
 Steam Carriage Company of Scotland, action at law against the Turnpike Road Company 305
 Steam Wheel on a new plan, (Woodhouse's)..... 145
 Steam Engine—
 Avery's Rotary..... 141
 Earl Dundonald's Revolving. 194
 Remarks relative to generally 239
 For pumping water..... 87
 Steam Navigation—
 Who was the first inventor of it..... 16
 Laws of motion regarding steam vessels..... 87
 Steam Ship in Miniature, described..... 64
 Steam Carriage—
 In Belgium, account of..... 19
 In Dublin..... 205
 Stephenson, jr.'s, specification of Patent for improving and supporting Iron Rails for Edge Railways..... 9
 Stoves for Coal (Dr. Nott's) useful to Tanners..... 9
 Straw Cutter (Green's)..... 144
 Stump Lifter..... 300
 Suspension Bridge—
 Fall of one..... 288
 Letter on it..... 157
 Swiftmess in a Fly, account of.. 19
 Studies, new, progress of in old age..... 102
- T.**
- Tank at Dover, (Eng.) containing 90,000 gallons of water.. 176
 Tanning—
 Method of described..... 120
 Specification of E. & D. Bell's Patent for improvements in..... 222
 Telegraph, oxy-hydrogen night one, account of Mr. Cady, the inventor's, first trial..... 64
- Telegraphic Language, origin of..... 203
 Telford (the Engineer's) Will.. 111
 Temperance—
 Contrasted with Dissipation.. *11
 Anecdote respecting..... *15
 Temperance and Intemperance, an instructive tale..... *42
 Thrashing Machine—
 Pitts', account of..... 44
 New one, performed by manual labor..... 178
- Tin—**
- Method of preparing for common use..... 61
 German..... 61
 Grained..... 62
 Mine Block..... 62
 Refined Block..... 62
 Method of Silvering by Powder of..... 63
- V.**
- Velocity in Moving Bodies..... *37
 Vermilion, Chinese, described.. 89
- W.**
- Washing Machine, Angevine's patent one..... 45
 Wash Board, Pullen's Metallic one, described..... 45
 Watch, repeating, machinery of described..... *13
 Water—
 Conversion of salt into fresh, method of..... 14
 Obtained by Boring..... 269
 Water Filter for Family Use... 175
 Wealth, on the right employment of..... 107
 Weights and Measures, comparative table of..... 107
 Wheel, Shifting Paddle, account of..... 19
 Wheels—
 Paddle, specification of Geo. Carter's improvements in.. 177
 Morgan's Improved..... 232
 For Railroad Cars, method of chilling, specification of patent granted Phineas Davis..... 233
 Whipple, W., a self-taught mechanic, biography of..... *14
 White Lead, specification of J. B. C. Torrosa's patent of improvements in making..... 165
 Woodside's Revolving Harrow and Seed Cart..... 19
- Y.**
- Youldon's Improvements in Curving Smoky Chimneys, described..... 81
- Z.**
- Zincography..... 96
